CSS	E2E test
Typescript	Git
ReactJS	SEO
NextJS	

WORK EXPERIENCE

Frontend Software Engineer
Tok&Stok
Company's brief description: Tok&Stok is a company that specializes in home decor and furniture retail.

📅 09/2021 – Current   📍 Brazil   Business area: Digital: e-commerce

Project 1:
- Main goal: Launch a website with new technologies aimed at B2B consumers
- Details and responsibilities: Raise technical requirements with the team and implement it according to Figma. The design system of the company was created at the same time, so we studied the requirements and implemented it by demand.
- Outcome: A simple e-commerce that is serving as inspiration to a new version of the main site. https://empresas.tokstok.com.br/
- Technologies: Storybook, Google Analytics, GitHub, TypeScript, Next.js, Storybook, Jest, React.js, CSS, Figma, Testing Library.

Project 2:
- Main goal: Launch a new and fast website aimed at B2C customers
- Details and responsibilities: Raise technical requirements with the team and implement it according to Figma
- Outcome: The project is still in progress. https://b2c-frontend-roan.vercel.app
- Technologies: Playwright, Storybook, Google Analytics, GitHub, TypeScript, Next.js, Jest, React.js, CSS, Figma, Testing Library.

Frontend Software Engineer
Grupo SBF
Company's brief description:

📅 01/2020 – 09/2021   📍 Brazil   Business area: Digital e-commerce - Client Squad

Project 1:
- Main goal: Build and maintain the attendance part of Centauro's site
- Details and responsibilities: Raise technical requirements with the team and implement it according to Figma
- Outcome: We launched new features for the customers. Now they can cancel their order or their vouchers and exchange some products.
- Technologies: React, Typescript, Github, Google Analytics, CSS, Figma.

Project 2:
- Main goal: Nike's Brazil - Build some pages dedicated to orders, vouchers and questions
- Details and responsibilities: Raise technical requirements with the team and implement it according to Figma. We also built design system components that support different sites with different themes.
- Outcome: The initial desired pages were implemented and launched.
- Technologies: Storybook, Google Analytics, GitHub, TypeScript, Next.js, Jest, React.js, CSS, Figma, Testing Library.
